NAU Blo 202 Lab 3 - Sheep Heart Dissection

What is a Sheep Heart Dissection? A sheep heart dissection involves cutting into particular areas of a sheep's heart so that we can see each of the different sections and learn more about what each part of a heart looks and feels like. A sheep's heart and sheep internal anatomy are very similar to a human, so it gives us an opportunity to learn more about what a human heart might look like on the inside.

Review Sheet 20 Dissection Of The Sheep Heart

You are basically going to be cutting each side of the heart so that you can look inside. (Some dissections will ask you to make a coronal cut where a single cut opens the entire back side of the heart). The heart below is marked to show you where the two incisions should be made. Optionally, you may cut the heart in half to expose the chambers.

Online Library Anatomy Lab Sheep Heart Dissection Answers Key

The dissection of the heart occurs in two phases. Phase 1 involves the examination of the external features and the identification of the four main vessels that can be viewed without cutting the heart open. Phase 2 involves the cutting of the heart so that the internal chambers and valves can be viewed.
