Animali (also called Metazoa) are multicellular eukaryotic organisms that form the biological kingdom Animalia.With few exceptions, animals consume organic material, breathe oxygen, are able to move, can reproduce sexually, and grow from a hollow sphere of cells, the blastula, during embryonic development.Over 1.5 million living animal species have been described—of which around 1 million ...

Animal - Wikipedia
Animal definition is - any of a kingdom (Animalia) of living things including many-celled organisms and often many of the single-celled ones (such as protozoans) that typically differ from plants in having cells without cellulose walls, in lacking chlorophyll and the capacity for photosynthesis, in requiring more complex food materials (such as proteins), in being organized to a greater degree ...
