After considering numerous options and variants, ISO 31000:2009 largely adopted the same broad process as AS/NZS 4360:2004 for managing risk as shown in Fig. 1. While the process is essentially steplike, in practice there is considerably iteration between the steps and between the continuously applied elements of communication and consultation ...

ISO 31000:2009 – setting a new standard for risk ...

The AS/NZS ISO 31000:2009 provides the internationally accepted basis for best practice risk management. The standard is non-prescriptive or generic in its application which provides a methodology of managing risk which is applicable for all types of organisations including governments. In addition to the standard there is an international guide: ISO Guide 73:2009, which provides the basic vocabulary that is designed to develop a common understanding of risk management concepts.
