### **Biographies Of Scientific Objects**

Addressing such questions, *Biographies of Scientific Objects* is about how whole domains of phenomena—dreams, atoms, monsters, culture, society, mortality, centers of gravity, value, cytoplasmic particles, the self, tuberculosis—come into being and sometimes pass away as objects of scientific study. With examples drawn from both the natural and social sciences, and ranging from the sixteenth to the twentieth centuries, this book explores the ways in which scientific objects are both real ...

## **Biographies of scientific objects (Book, 2000) [WorldCat.org]**

Galileo, in full Galileo Galilei, (born February 15, 1564, Pisa [Italy]—died January 8, 1642, Arcetri, near Florence), Italian natural philosopher, astronomer, and mathematician who made fundamental contributions to the sciences of motion, astronomy, and strength of materials and to the development of the scientific method.

## **Galileo | Biography, Discoveries, & Facts | Britannica**

Daston is convinced that scientific objects are created by inquiring minds rather than 'discovered' in the environment. Many would disagree, but I think the arguments are of great interest. For example, 'ether' was an object of 'scientific research' for much of
