Biology Ch 14 section 2 Francesco Redi performed a controlled experiment with fies and maggots to test this idea on the origin of life. Many scientists believe that eukaryotic cells evolved from these early prokaryotic This allows for replication of proteins.

Biology Ch 14 section 2 by Kitty Crosby on Prezi Next

9.1 Signaling Molecules and Cellular Receptors. Cells communicate by both inter- and intracellular signaling. Signaling cells secrete ligands that bind to target cells and initiate a chain of events within the target cell. The four categories of signaling in multicellular organisms are paracrine signaling, endocrine signaling, autocrine signaling, and direct signaling across gap junctions.
