Chapter 14 - The Human Genome The Human Genome Project (HGP) formally began in 1990 and was finished in 2003. The goal was to discover the DNA sequences for all of the 20,000-22,000 genes that are found in human beings. This knowledge is vital for research into genetic disorders and possible genetic solutions to these disorders.

14.1 Historical Basis of Modern Understanding. DNA was first isolated from white blood cells by Friedrich Miescher, who called it nuclein because it was isolated from nuclei. Frederick Griffith's experiments with strains of *Streptococcus pneumoniae* provided the first hint that DNA may be the transforming principle. Avery, MacLeod, and McCarty showed that DNA is required for the transformation ...
