Kent Britain WASVJB If you're planning to build an EME array, don't use these antennas. But if you want to put together a VHF Rover with less than \$500 in the .antennas, read on. The simplified feed uses the structure of the antenna itself for impedance matching. So the design started with the feed and the elements were built around it.

### Controlled Impedance Cheap Antennas Kent Britain WASVJB

Controlled impedance (and Cheap) Antennas by Kent Britain, WASVJB describes how to build a VHF rover antenna for less than \$500, by RF expert Kent Britain. Part of the "How to build a cheap yagi antenna" article series.
