A wonderful gift for Mother's Day, Easter, a Birthday, Christmas, Graduation, or any other special occasion

A comprehensive study guide offering in-depth explanation, essay, and test prep for Jonathan Swift’s Gulliver’s Travels, an immediate popular success when it was published as Travels Into Several Remote Nations of the World in 1726. As a novel of eighteenth century Britain, Gulliver’s Travels was a satire on human nature and a parody of the "travellers' tales" literary subgenre that was popular at the time. Moreover, Swift has given us a book which helps us measure our achievements, our failures and our predicaments against those of another age and another set of values. This Bright Notes Study Guide explores the context and history of Swift’s classic work, helping students to thoroughly explore the reasons it has stood the literary test of time. Each Bright Notes Study Guide contains: - Introductions to the Author and the Work - Character Summaries - Plot Guides - Section and Chapter Overviews - Test Essay and Study Q&As The Bright Notes Study Guide series offers an in-depth tour of more than 275 classic works of literature, exploring characters, critical commentary, historical background, plots, and themes. This set of study guides encourages readers to dig deeper in their understanding by including essay questions and answers as well as topics for further research.

Peter E. Vaillancourt presents a collection of popular and emerging methodologies that take advantage of E. coli's ability to quickly and inexpensively express recombinant proteins. The authors focus on two areas of interest: the use of E. coli vectors and strains for production of pure, functional protein, and the use of E. coli as host for the functional screening of large collections of proteins and peptides. Among the cutting-edge techniques demonstrated are those for rapid high-level expression and purification of soluble and functional recombinant protein and those essential to functional genomics, proteomics, and protein engineering. Use E. coli as a host organism for expressing recombinant proteins Produce pure, functional protein using E. coli vectors and strains Functionally screen large collections of proteins and peptides using E. coli as a host.

An annotated bibliography.

April is unprepared to return to Tarnished Silver when her father suddenly dies. She must take over running the family vineyard in the north Georgia mountains, but it's not in her plans to stay. To make things worse, her ex-boyfriend is not running the stables on the property, which makes her want to leave soon. That is until she figures out that someone has forged some documents and changed her father's will. Brad never got over April, but he forced himself to move on. When she comes back to run the vineyard, he's forced to deal with the old feelings that come crashing back in. He'd do anything to protect her and when he sees that this could be more than just a money thing, he steps in to help with the investigation.Together they must

figure out who is behind the forged paperwork before the deadline is up. The more they work together, the closer they are to reuniting until someone gets in the middle and does everything to keep them apart, permanently.
