"With a solid foundation of basic science knowledge and a basic understanding of concepts and vocabulary, students will be prepared for higher-order thinking and inquiry-based activities"--Back cover.

This book promotes science vocabulary building, increases student readability levels, and facilitates concept development through fun and challenging puzzles, games, and activities.

This revised edition offers 200 puzzles for home or school! Learn science terms, build a solid science foundation, and exercise your higher-level thinking skills with these fun-to-do, and often challenging, science puzzles. This book covers life science, earth science, physical science and the human body. Answers are provided.

Developed for grades 6-12, this rich resource provides teachers with practical strategies to enhance science instruction. Strategies and model lessons are provided in each of the following overarching topics: inquiry and exploration, critical thinking and questioning, real-world applications, integrating the content areas and technology, and assessment. Research-based information and management techniques are also provided to support teachers as they implement the strategies within this resource. This resource supports core concepts of STEM instruction.

Hands-on investigations give scientists in grades 5–6 the skills they need for success! Skill-Building Science includes lessons, activities, and writing exercises on physical science, earth science, and life science. Biographies of scientists with accompanying activities increase student awareness of scientist as an occupation. This 128-page book includes reproducibles, aligns with state, national, and Canadian provincial standards, and supports National Science Education Standards.

From the Crossword Puzzles for the Classroom Series, Science Crossword Puzzles: Grades 3-6 comprises 10 crossword puzzles: Animal Characteristics, Matter and Energy, Forces and Motion, The Human Body, Marine Life, Our Solar System, Plants, Weather, Earth Science, and Rocks and Minerals. Also included are a word search puzzle and 2 anagram activities. Solutions for all puzzles are provided.

Children will learn about plants, animals and other science subjects through the use of crossword puzzles.
