Animal Stories Encounters with Alaskas Wildlife

Alaska has also had its share of mysterious water beasts, and one of these is a monster that supposedly lurks around Alaska's Kodiak Island, off the south coast. One of the first modern sightings which put the creature on the map occurred in April of 1969, when the shrimp boat the Mylark was running a sonar scan of the bottom when they made a peculiar finding.

Essays of memorable, astonishing—and in some instances, life-changing—encounters with wild animals. A reminder that nature's wondrous wild surrounds us all the time, wherever we live, if we'll only open our senses and pay attention.

These timeless, beautifully written essays share encounters and observations on a variety of Alaskan wildlife and include natural history information. In these essays about Alaska's best-known and most charismatic animals—grizzlies and wolves, moose and Dall sheep, bald eagles and beluga whales—Sherwonit also introduces readers to many of Alaska's largely overlooked species, from wood frogs to redpolls and shrews to lynx and wolverines. The stories are geographically diverse, stretching across the state, from the Panhandle to the Arctic, and also from Alaska's urban center, Anchorage, to its most remote backcountry. Sherwonit examines the complicated relationships humans have with other animals and consider different ways of knowing, and relating to, these critters. Animal Stories increases readers' awareness and questions their own relationships with wild neighbors, wild relatives, and the inherent value that these animals have, irrespective of what they give to us.

Collector of bear lore for nearly half a century, author Larry Kaniut has chosen these tales and legends for their focus on the wisdom of bears and the strength of the human spirit in encounters with them. An Alaskan legend himself, Larry brings together 28 amazing stories of encounters with this four-legged wonder of the woods, spanning the time period from 1816 to 1999.

"Nearly thirty years after the Exxon Valdez oil spill, land managers and stakeholders explore the ongoing paradox of accommodating human use while reducing environmental impact in Prince William Sound"--Provided by publisher.

Updated edition of Bill Sherwonit's 2002.

Presents a collection of nature and science essays published in American periodicals in 2013, including works by such authors as Katherine Bagley, Barbara Kingsolver, Fred Pearce, and Carl Zimmer.

It is nearly impossible to live in Alaska without being influenced by its natural environment. Residents have no choice but to coexist with the Alaska wilderness and its animal inhabitants, and this extraordinary experience—along with the stunning landscape—is what often draws people to Alaska. *Wild Moments* offers a fascinating range of creative nonfiction essays that describe the chance meetings that bring Alaska residents face to face with their animal neighbors. These imaginative accounts speak to the ability of nature to transform the human experience, and the authors urge us through their works to protect these often threatened creatures who share our planet. The contributors to this collection include some of Alaska's most prestigious nature writers, such as Peggy Shumaker, Ned Rozell, Nick Jans, Debbie S. Miller, Craig Childs, Richard Nelson, and Drew Pogge. *Wild Moments* presents some of the best and most innovative nonfiction writing in an environmental context, and it will be of interest to all readers with a passion and concern for the natural world.

The Key to the Red Workbook gives clear, thoroughly-explained answers to all exercises in the Red Workbook, the second of four non-sequential books in the Grammar for the Well-Trained Mind series, providing detailed, well-designed exercises in the correct use of English grammar. The Key, along with the accompanying Red Workbook and the Core Instructor Text, make up Grammar for the Well-Trained Mind: a complete course that takes students from basic definitions ("A noun is the name of a person, place, thing, or idea") through advanced sentence structure and analysis—all the grammar skills needed to write and speak with eloquence and confidence. This innovative program combines the three essential elements of language learning: understanding and memorizing rules (prescriptive teaching), repeated exposure to examples of how those rules are used (descriptive instruction), and practice using those rules in exercises and in writing (practical experience). Each year, parents and teachers go through the dialogue, rules, and examples in the Core Instructor Text; students follow along in the Workbook. This repetition solidifies the concepts, definitions, and examples in the student's mind. There are four Student Workbooks, one for each year. Each Student Workbook contains the same rules and examples—but four completely different sets of exercises and assignments, allowing students to develop a wide-ranging knowledge of how the rules and examples are put to use in writing. Each Key to the Workbooks provides not only answers, but also explanations for the parent/instructor, and guidance as to when the answers might be ambiguous (as, in English, they often are). All of the rules covered, along with the repeated examples for each, are assembled for ongoing reference in the Comprehensive Handbook of Rules. This will become the student's indispensable guide to writing through high school, into college and beyond. Step-by-step instruction takes students from the most basic concepts through advanced grammatical concepts such as modal and hortative verbs and multiple functions of noun clauses. Extensive diagramming exercises reinforce the rules and help technical and visual learners to understand and use the English language effectively. Each step of the diagramming process is illustrated and thoroughly explained to the student. Text for examples and exercises are drawn from great works of literature, as well as from well-written nonfiction texts in science, mathematics, and the social sciences. Regular review is built into each year of work. The Key accompanies the second of four non-sequential workbooks, each containing new exercises that allow students to practice and apply the grammar principles under study.

Describes both humorous and deadly contacts between humans and bears in Alaska and reviews the precautions for avoiding a bear attack
