Describes how elementary teachers can build healthy learning communities through language, providing examples of words, phrases, and language use to help students become strategic thinkers and develop literacy skills.

"Introducing a spelling test to a student by saying, 'Let's see how many words you know,' is different from saying, 'Let's see how many words you know already.' It is only one word, but the already suggests that any words the child knows are ahead of expectation and, most important, that there is nothing permanent about what is known and not known." — Peter Johnston Sometimes a single word changes everything. In his groundbreaking book *Choice Words*, Peter Johnston demonstrated how the things teachers say (and don't say) have surprising consequences for the literate lives of students. Now, in *Opening Minds: Using Language to Change Lives*, Peter shows how the words teachers choose affect the worlds students inhabit in the classroom, and ultimately their futures. He explains how to engage children with more productive talk and to create classrooms that support not only students' intellectual development, but their development as human beings. Grounded in research, *Opening Minds: Using Language to Change Lives* shows how words can shape students' learning, their sense of self, and their social, emotional and moral development. Make no mistake: words have the power to open minds – or close them.

Simple changes in a teacher's language can bring about profound changes in students and classrooms. By paying attention to your words and tone of voice, you will: Increase students' engagement with academics Build positive community More effectively manage your classroom That is the message of *The Power of Our Words*, a book that has changed the teaching lives of tens of thousands of educators since it was first published in 2007. In this updated second edition you will find practical information to help you: Lead students in envisioning themselves achieving success Use questions that encourage deep and creative thinking Listen to students in ways that support their growth Reinforce students efforts and remind or

Increasingly, educators are recognizing that for children to thrive intellectually they need socially and emotionally healthy classrooms. Conveniently, this is exactly what parents have always wanted for their children--classrooms that offer and grow positive relationships and behavior, emotional self-regulation, and a sense of well-being. Using the guiding principles from Peter Johnston's best-selling professional resources, *Choice Words* and *Opening Minds*, Peter and six colleagues began a journey to create just such classrooms--environments in which children meaningfully engage with each other through reading, writing, making, and discussing books. In *Engaging Literate Minds*, you'll discover how these teachers struggled and succeeded in building such classrooms. Inside you'll find the following: Practical ways to develop a caring learning community and children's socio-emotional competence Powerful teaching practices from real classrooms Engaging ways to encourage inquiry and student agency Suggestions on how to use formative assessment in everyday teaching practices Helpful research behind the classroom practices and children's development Ways to help students inspire and support each other Building a just, caring, literate society has never been more important than it is today. By embracing the ideas and teaching strategies in *Engaging Literate Minds*, you can help children to become socially, emotionally, and intellectually healthy. Not only do these classroom practices develop the skills to achieve district benchmarks and beyond, they help develop children's humanity.

Selected as an Outstanding Academic Title by *Choice Magazine*, January 2010 Classroom talk, by which children make sense of what their peers and teachers mean, is the most important educational tool for guiding the development of understanding and for jointly constructing knowledge. So what practical steps can teachers take to develop effective classroom interaction? Bringing together leading international researchers and drawing on the pioneering work of Douglas Barnes, this book considers ways of improving classroom talk. Chapters cover: - classroom communication and managing social relations; - talk in science classrooms; - using critical conversations in studying literature; - exploratory talk and

thinking skills; - talking to learn and learning to talk in the mathematics classroom; - the 'emerging pedagogy' of the spoken word. With an accessible blend of theory, research and practice, the book will be a valuable resource for teachers, teacher-trainers, policy makers, researchers and students.

Are you a woman who isn't sure of who you are because life's experiences have given you so many identities? Are you a powerful woman? Are you a woman who's confident in herself? Are you a woman with a sharp mouth? Are you a woman who feels deep down you have more to offer? Are you a woman who wants to change but just doesn't know how? Are you a woman who battles with your words because that's all you know how to use them? Are you a woman who struggles with timing? Are you a woman who gets confused about making the right choices for herself? Are you a woman who doesn't know her self-worth? Are you a woman who has never considered her possibilities? Are you a woman who still acts like a little girl? Are you a woman who wants everyone to like you? Are you a woman who feels incomplete? Are you a woman who thinks a mate will complete you? Well, if so, this book is for you. This book will open your eyes to the possibility of not just who you are, BUT who you will be if you genuinely believe God's will is best for you. This book describes and documents an exciting new approach to educating literacy teachers. The authors show how to help teachers develop their own critical literacy, while also preparing them to accelerate the literacy learning of struggling readers. The text takes readers inside a literacy lab in a high-poverty urban elementary school, reveals the instructional approach in action, and provides many excellent examples of critically responsive teaching. Featuring a synthesis of several fields of theory and research, this book: illustrates teacher preparation and development as personal and social transformation - demonstrating that this process requires changing the ways teachers think about students, language, culture, literacy, learning, and themselves as educators; provides pedagogical tools - including the history of the innovative literacy lab, the context of the instructional interactions, and the transition from a university-based to a school-based project; and combines critical and accelerative literacy instruction, showing how teachers can accelerate the slowest developing readers in their classrooms and also build a sense of engagement for students with the social world.

This easy-to-read text will guide K-3 teachers as they develop a reading and writing program for all their students. An apprenticeship approach to literacy emphasizes the role of the teacher in providing demonstrations, engaging children, monitoring their understanding, providing timely support and, ultimately, withdrawing that support as the child gains independence. Drawing on authentic classroom examples—student writing samples, class schedules, photographs, and rich transcriptions of teaching and learning interactions—the authors illustrate instruction that is aimed at children's learning zones. As children become more competent readers and writers, the instructional interactions are adjusted to accommodate their higher-level learning. Here is a wealth of in-depth information, specific strategies, and organizational formats in literacy areas such as: principles of apprenticeship literacy; learning to read from a cognitive apprenticeship

approach, including the roles of read-aloud, familiar reading, and shared reading; guided reading, including flexible grouping, reading and writing links, and instructional interactions that emphasize problem-solving strategies; helping children develop writing strategies through interactive writing, writing aloud, and revising and editing transactions; transitions in children's independent writing, including their relationship to modeling and coaching demonstrations during assisted writing; helping children acquire phonological knowledge, including activities that guide children in manipulating letters, sounds, and spelling patterns; a typical day of putting it all together in two apprenticeship settings: a first-grade classroom and a Title I reading program; using school-based professional literacy teams to support teachers in developing an effective literacy program for their children. No detail is lost. The authors also cover such practical matters as establishing routines and organizing the classroom environment, including rotation schedules for meeting with small groups of children, lists of materials for establishing literacy corners, and literacy corner activities designed to provide the children with opportunities for independent practice. With Apprenticeship in Literacy you can achieve a balanced literacy program that works for all your students.

"Exciting and engaging vocabulary instruction can set students on the path to a lifelong fascination with words. This book provides a research-based framework and practical strategies for vocabulary development with children from the earliest grades through high school. The authors emphasize instruction that offers rich information about words and their uses and enhances students' language comprehension and production. Teachers are guided in selecting words for instruction; developing student-friendly explanations of new words; creating meaningful learning activities; and getting students involved in thinking about, using, and noticing new words both within and outside the classroom. Many concrete examples, sample classroom dialogues, and exercises for teachers bring the material to life. Helpful appendices include suggestions for trade books that help children enlarge their vocabulary and/or have fun with different aspects of words"--
