research results of child development experts, and addressing the key areas of development-math, reading, verbal communication, science, self-awareness, and social skills-the authors explain the process of learning from a child's point of view. They then offer parents 40 age-appropriate games for creative play. These simple, fun--yet powerful exercises work as well or better than expensive high-tech gadgets to teach a child what his ever-active, playful mind is craving to learn.

Discusses the growing trend toward accelerated learning and the pressure put upon parents to meet constant expectations, introducing creative games that parents can play with their child to enhance development.

In their first three years of life, babies face the most complex learning endeavor they will ever undertake as human beings: They learn to talk. Now, as researchers make new forays into the mystery of the development of the human brain, Golinkoff and Hirsh-Pasek, both developmental psychologists and language experts, offer parents a powerfully insightful guidebook to how infants—even while in the womb—begin to learn language. Along the way, the authors provide parents with the latest scientific findings, developmental milestones, and important advice on how to create the most effective learning environments for their children. This book takes readers on a fascinating, vitally important exploration of the dance between nature and nurture, and explains how parents can help their children learn more successfully.

Today's children will forge careers that look nothing like those their parents and grandparents knew. Even the definitions of "career" and "job" are changing as people create new businesses and services. Although these changes are well underway, our education system in the U.S. lags behind and still subscribes to the idea that content is king. This exclusive focus on content is reflected in what we test, how we teach, and even the toys we offer our children. Employers want to hire excellent communicators, critical thinkers, and innovators-in short, they want brilliant people. So what can we do, as parents, to help our children be brilliant and successful? Golinkoff and Hirsh-Pasek provide a science-based framework for how we should be teaching children in and outside of school. Using fun and engaging examples, the authors introduce the 6Cs-collaboration, communication, content, critical thinking, creative innovation, and confidence-along with tips to optimize children's development in each area. These skills will make up the straight-A report card for success in the 21st century. Book jacket.

Parents have a unique opportunity to harness their children's curiosity and channel it into the development of habits of heart and mind that will serve them throughout their lifetime. Playful learning

The high quality laminated cards are durable and store conveniently in a slipcase. Their portability helps make Baby Einstein Language Discovery Cards the perfect on-the-go learning activity for babies and toddlers.

A cutting-edge handbook for parents from a pioneer in infant brain development Should you really read to your baby? Can teaching a baby sign language boost IQ? Should you pipe classical music into the nursery? Dr. Stamm translates the latest neuroscience findings into clear explanations and practical suggestions, demonstrating the importance of the simple ways you interact with your child every day. It isn't the right "edu-tainment" that nurtures an infant's brain. It is as simple as Attention, Bonding, and Communication, and it's within every parent's ability to provide. Practical games and tips for each developmental age group will show you not only what the latest findings are but, more importantly, tell you what to do with them.
