Internal pressure design calculations of pipe and pipe fittings according to EN 13480-3 are independent of lengths of elements defined in the CAEPIPE stress model. Hence, these calculations can be performed directly from the existing stress model developed for flexibility analysis.

An October 2007 conference allowed scientists and engineers from around the world to exchange information on advanced, high-efficiency coal power plants. Papers from the conference are presented here, in sections on boilers, turbines, oxidation, creep/life management, welding, and oxy fuel. Some specific topics include materials solutions for advanced steam power plants, consideration of weld behavior in the design of high temperature components, nickel alloys for high efficiency fossil power plants, and
