This volume is a collection of papers on number theory which evolved out of the workshop WIN--Women In Numbers, held November 2-7, 2008, at the Banff International Research Station (BIRS) in Banff,

Access Free  
Handbook Of  
Alberta, Canada.  
It includes  
articles  
showcasing  
outcomes from  
collaborative  
research  
initiated during  
the workshop as  
well as survey  
papers aimed at  
introducing  
graduate  
students and

recent PhDs to  
important  
research topics  
in number  
theory. The  
contributions in  
this volume span  
a wide range of  
topics in  
arithmetic  
geometry and  
algebraic,  
algorithmic, and  
analytic number

theory. Clusters  
of papers center  
around the four  
topics of moduli  
spaces and  
Shimura curves,  
curves and  
Jacobians over  
finite fields,  
Galois covers of  
function fields  
in positive  
characteristic,

graphs, with a  
fifth group of  
three individual  
articles on  
modular forms,  
Iwasawa theory,  
and Galois  
representations,  
respectively.  
The workshop and  
this volume are  
part of a  
broader WIN

initiative, whose goals are  
to highlight and  
increase the  
research  
activities of  
women in number  
theory and to  
train female  
graduate  
students in  
number theory  
and related  
fields.

the field of  
cryptography. It  
discusses some  
of the critical
