Construction equipment and machine parts are going missing all over Stermont! Then an entire playground disappears! Could a monster be to blame? The Super Secret Monster Patrol will need to stop this crafty monster FAST -- before the whole town falls

CCH's Federal Tax Study Manual is designed to enhance learning and improve comprehension for students of federal tax. Clear and concise summaries along with hundreds of review questions and answers help students understand the complexities of today's tax laws. Designed as an extra aid for students using CCH's industry-leading tax textbooks, the Study Manual highlights and reinforces the key tax concepts presented in: CCH's Federal Tax Course, CCH's Federal Taxation: Comprehensive Topics, and CCH's Federal Taxation: Basic Principles.The CCH Federal Tax Study Manual provides students with an approach that combines self-study with programmed learning. Throughout the Study Manual, main concepts are presented in a concise yet thorough fashion, allowing students to focus on and apply pertinent information. Chapter-by-chapter summaries and easy-to-read outlines highlight the indepth textbook explanations. Objective questions and problems (with solutions provided) are structured to help students master, apply and later review materials presented in each chapter.

Recent advances in air pollution monitoring and modeling capabilities have made it possible to show that air pollution can be transported long distances and that adverse impacts of emitted pollutants cannot be confined to one country or even one continent. Pollutants from traffic, cooking stoves, and factories emitted half a world away can make the air we inhale today more hazardous for our health. The relative importance of this "imported" pollution is likely to increase, as emissions in developing countries grow, and air quality standards in industrial countries are tightened. Global Sources of Local Pollution examines the impact of the long-range transport of four key air pollutants (ozone, particulate matter, mercury, and persistent organic pollutants) on air quality and pollutant deposition in the United States. It also explores the environmental impacts of U.S. emissions on other parts of the world. The book recommends that the United States work with the international community to develop an integrated system for determining pollution sources and impacts and to design effective response strategies. This book will be useful to international, federal, state, and local policy makers responsible for understanding and managing air pollution and its impacts on human health and well-being.

The rise of Chinese female athletic participation and success in international competitions has become the backbone for China's rise to sports relevance, and has been unlike historical Western nation-states' experience in athletics. This historical examination chronologically documents the rise of Chinese elite female athletes and the policies affecting athletes from 1949 to the present, and reveals a connection between female athletic success and state enforced gender equality policies that targeted culture, education, and labor. Through gender equality policies, men and women were uniformly exposed to a national sports system that invested in research, training, equipment, recruitment, and incentivizing athletes "to win honors for the country." Moreover, this examination evaluates various hypotheses on what Chinese policies, if any, have produced these extraordinary results, and proposes the sports system, although exceptionally successful, is ultimately imbalanced and plateauing, while the Chinese Communist Party desires participation, power, and control at the expense of possible broad athletic victory.

Recent years have seen growing popular absorption with "spirituality" in all its forms. But as this study shows, it is largely separated from theology. Spirituality has grown more self-referential and is subverted by consumerist mentality, while theology has grown critically proficient but uneasy in speaking from or to the heart of Christian mysteries. Through a study of exemplary writers such as Gregory of Nyssa, McIntosh recovers an understanding of the inner integrity of mystical consciousness and theological expression. The final chapters test the possibility of renewed conversation between spirituality and theology by drawing on spiritual traditions to re-think contemporary problems in Trinitarian thought, Christology, and the understanding of the self. This book offers not only an analysis of spirituality and theology in the eras of their united activity, but also a hermeneutic for the theological appropriation of spirituality and a sustained argument for the renewal of mystical theology.

Recently separated Phil Ockerman falls hard for Bertha Strunk at a tango lesson in Clerkenwell. Bertha also bears a strong resemblance to the seventeenth-century Venetian singer and composer Barbara Strozzi (with whom Phil happens to be obsessed), to the point where Phil is no longer sure which is which... Navigating several London Underground lines and considerable planetary activity, Russell Hoban's intriguing romance tangles its way through a world of infidelity, artificial eyeballs, baseball bats and music - never missing a daring, seductive step.
