It's not as if the bible is silent as to the race or skin colouration of Jesus Christ, the truth is there, but, it is just the way it has been presented in textbooks, movies, stories, Hollywood, making Jesus to appear to be a white man. On the contrary, the bible itself left enough allegory to the physical characteristics of Jesus in several verses that indicates the real Jesus may have been a black man, and not the white, blonde-haired, blue-eyed Jesus the world has been made to believe.

The Bible doesn't identify any specific person by their skin color, though there are indications that some people in the Bible were black. Most all the history related through the Bible occurs in the Middle East where most people are, and have been for recorded history, brown skinned. The Ethiopian eunuch in Acts 8:37 was almost certainly black. Ethiopians are mentioned about 40 times in the Bible, and we can assume that these are references to black people, since Ethiopians are black. The prophet Jeremiah asked, "Can the Ethiopian change his skin?" (Jeremiah 13:23)—the natural assumption is that Jeremiah refers to black skin. Another was Cush, which is the Hebrew word for black. Cush was the father of the black people. Shem was the patriarch of the Jewish and Arab people who settled the Middle East. Genesis 11 follows the line of Shem to Abram (God changed his name to Abraham) the first man to be called a Hebrew (Genesis 14:13).

If you ever wanted IRREFUTABLE EVIDENCE that black people wrote the Bible, you are looking at it! Anyone or group of people can claim to be the Lost Tribes of Israel. That is easy. But making such a claim does not mean it is true. Therefore, what separates the GENUINE Israelites from the wannabes is the EVIDENCE or PROOF they provide to support their claim. Sadly, there are reckless black people making such claims but when challenged for proof, they have nothing to show and come up short. Consequently, their blundering undermines our genuine Hebrew identity and turns it into a joke. Thus, because of their rash behaviour they cause huge damage to our black history. This book aims to arrest the damage done to our heritage by these less informed black people. It does so by providing the necessary evidence, which proves that large sections of the black race are the true Israelites. The PROOF/EVIDENCE provided in this book is quite unique. It is unlike anything you have read before and will ever read anywhere else. Also, it is comprehensive and designed to forever silence the critics. You will read information that nobody else knows but only the direct descendants of the ancient Israelites know about. Thus, proving conclusively that we are indeed who we claim to be - the true children of Israel.

From Volume I: Abraham and his wife made their African slave a surrogate mother and she bore Abraham a half-black heir. Later, God wished to use Moses and his Ethiopian wife and half-Ethiopian sons to raise up a new race of Jews to replace the twelve tribes of Israel. Let's not forget that the Almighty did not object when Jacob passed "the blessing of Abraham" on to his half-African grandsons, Ephraim and Manasseh, in North Africa. In light of these facts it's amazing that early Americans wondered if blacks could be saved especially since it was big news to Jews that gentiles (Europeans) could be saved. Prior to the Apostles of Christ's debate about whether Europeans, called gentiles in Scripture, could be saved, Niger and Lucius were black Bible teachers at Antioch (where believers were first called Christians) and an Ethiopian eunuch had been saved and baptized. (Acts 13:1, 15:7) The first king, queen, prince, and princess in the Bible were black. It was an African princess who found Moses floating down the Nile in Africa. Later Esther a dark skinned Jew won a black beauty contest that stretched from India to Ethiopia. Blacks in the Bible Vol. I shows you truths stranger than fiction.

Surprisingly, all 5 billion Bibles translated in whole or in part into nearly 3,000 languages sprang from Black African manuscripts. The oldest Hebrew Old Testament manuscripts, the oldest Greek New Testament manuscripts, and the oldest Greek translation of the Hebrew Old Testament (called the Septuagint), are all African documents. After 25 years of preparation, Firpo Carr is releasing the latest in his string of books. He is the only one who could have written it with such ferocity. A number of fragments among the world famous Dead Sea Scrolls are African documents. In fact, the oldest document

among the Dead Sea Scrolls is an African manuscript. Carr brings a unique perspective since he personally worked extensively with Prof. Dr. John C. Trever, the late Bible scholar who was the first Westerner to discover the Dead Sea Scrolls and announce their existence to the world. Only a handful of scholars around the world were exposed to what was at the time the 2,000-year-old unpublished Dead Sea Scrolls. Carr was not only one of these, but was the only Black man to have done so. As a Man of Color, he was able to see through a set of lenses different from those of his colleagues. He was accorded the privilege of being in the "inner circle" since he was the first person ever to take color photographs of the oldest most complete version of the Hebrew Old Testament in the form of the 1,000-year-old Codex Leningrad B19a, located at the time in the Soviet Union, now Russian Federation. His daring adventures there made international news. Showing the influence of Black African rulers in the Hebrew Old Testament in the present book, the title "Pharaoh" is mentioned approximately 271 times in the first half of the Bible. Five pharaohs are mentioned by name, while eight remain anonymous. This book discusses an African Greek New Testament manuscript that was initially deemed the oldest of its kind until it was "re-dated" so as to lose that distinction. It was also first recognized as the best and most important manuscript in its genre. Scholars with questionable motives have even argued that the impressive Greek New Testament African manuscript is from anywhere but Africa, even though it is fabulously known as the Codex Alexandrinus, named after the Egyptian city of Alexandria from which it came. Amazingly, the Greek New Testament was "officially" cataloged in Africa in the fourth century CE. However, in the early centuries after Christ's death, distinguished African-born Christian historians, writers, and theologians like Origen, Athanasius (who was derisively called a "black dwarf"), and St. Augustine confirmed that the 27 books of the Greek New Testament had already been assembled and collectively recognized by the first-century Christian community at large. Not knowing the above details as presented in this publication by a Black man who was in the "inner circle," some see the Bible as "the White man's book." While the oppressive White European Catholic Church, which sponsored the horrors of the Inquisition and engaged in other unconscionable acts, endeavored to prevent the Bible from being translated into the language of the common people, a handful of brave White European "revolutionary" translators like John Wycliffe, William Tyndale, and Martin Luther confronted the Church head-on and dared to translate the Bible in such a way that even a 'plow boy' could read it. Rome responded with a vengeance by hunting some of these down and burning them alive at the stake. These godly, honorable men are descriptively called "Snowballs in Hell" in the third section of this book. And what of the Black Christians who were contemporaries of the Bible translating martyrs? These and other long-overlooked and forgotten persons of African descent--peppering all strata of European society--are discussed in detail in this unparalleled piece of literature, "Black Bible Manuscripts: Why the Bible Isn't the White Man's Book.

The second book in a 3 volume set, this is a companion volume to African Origins of the Major Western Religions and The Need for a Black Bible. An invaluable resource for anyone seeking to gain a better understanding of belief systems in the Western world.
