The CEO of Gallup and author of "The Coming Jobs War" says what everyone in the world wants is a good job.

~~Jim Clifton - The Coming Jobs War~~

What they should do is recognize that the world is in a war for jobs. It seems that leadership has lost the will to win, especially in America, but this is a competition for our lives. To win, leaders need to compete. Everyone does. The public school system needs to inculcate kids with the knowledge they'll need to compete in the jobs war.

Definitive leadership strategy for fixing the American economy, drawn from Gallup ' s unmatched global polling and written by the company ' s chairman. What everyone in the world wants is a good job. " This is one of the most important discoveries Gallup has ever made, " says the company ' s Chairman, Jim Clifton. In The Coming Jobs War, Clifton makes the bold assertion that job creation and successful entrepreneurship are the world ' s most pressing issues right now, outpacing runaway government spending, environmental degradation and even the threat of global terrorism. The book is grounded in findings from Gallup ' s World Poll, which reveals the implications of the jobs war on everything from economics to foreign policy to nothing less than America ' s moral authority in the world. And it offers a prescription for attacking the jobs issue head-on. Clifton argues that the solution to creating good jobs must be found in cities, not in the federal government. Promoting entrepreneurship and job creation must be the sole mission and purpose of cities ' business leaders, government officials and philanthropists. Clifton says that the next big breakthrough will come from the combination of the forces within big cities, great universities and powerful local leaders. Their combined effect is the most reliable, controllable and predictable solution to America ' s biggest problem. Strong leadership teams and a natural order are already in place within cities — in governments and local business and philanthropic entities, with caring leaders working on initiatives to fuel local economic growth and to create good jobs. The feat these leaders have to pull off is doubling their entrepreneurial energy by aligning their local forces: local tribal leaders, super mentors and universities. Winning the jobs war will require all hands on deck, and failure is not an option, especially for the United States, which has been the global leader in promoting freedom and entrepreneurship. America ' s place in the world is at stake, and there are other countries poised to surpass a sputtering U.S. economy that is currently growing at only 2% annually. The biggest threat? China, with a GDP that is increasing at nearly 10% annually — a pace that will make it the world ' s leading and most influential economy within the next 30 years. While the statistics are dire, Clifton remains optimistic about America ' s ability to win the jobs war because America has been here before. " The Greatest Generation saved America by beating the Japanese and Germans at [World War II]. The Baby Boomers saved America a second time by beating the same foes, Japan and Germany, in an economic war that determined the leadership of the free world, again, " he says. The Coming Jobs War offers a clear, brutally honest look at America ' s biggest problem and a cogent prescription for solving it.

Gallup chairman and CEO Jim Clifton presents his perspective on current global employment and job creation issues, how these affect society in general, and his recommendations for creating good jobs.

Definitive leadership strategy for fixing the American economy, drawn from Gallup ' s unmatched global polling and written by the company ' s chairman. What everyone in the world wants is a good job. China, with a GDP that is increasing at nearly 10% annually — a pace that will make it the world ' s leading and most influential

economy within the next 30 years. While the statistics are dire, Clifton remains optimistic about America's ability to win the jobs war because America has been here before. "The Greatest Generation saved America by beating the Japanese and Germans at [World War II]. The Baby Boomers saved America a second time by beating the same foes, Japan and Germany, in an economic war that determined the leadership of the free world, again," he says. The Coming Jobs War offers a clear, brutally honest look at America's biggest problem and a cogent prescription for solving it.

From 2020 Democratic presidential candidate Andrew Yang, a captivating account of how "a skinny Asian kid from upstate" became a successful entrepreneur, only to find a new mission: calling attention to the urgent steps America must take, including Universal Basic Income, to stabilize our economy amid rapid technological change and automation. The shift toward automation is about to create a tsunami of unemployment. Not in the distant future--now. One recent estimate predicts 45 million American workers will lose their jobs within the next twelve years--jobs that won't be replaced. In a future marked by restlessness and chronic unemployment, what will happen to American society? In *The War on Normal People*, Andrew Yang paints a dire portrait of the American economy. Rapidly advancing technologies like artificial intelligence, robotics and automation software are making millions of Americans' livelihoods irrelevant. The consequences of these trends are already being felt across our communities in the form of political unrest, drug use, and other social ills. The future looks dire-but is it unavoidable? In *The War on Normal People*, Yang imagines a different future--one in which having a job is distinct from the capacity to prosper and seek fulfillment. At this vision's core is Universal Basic Income, the concept of providing all citizens with a guaranteed income--and one that is rapidly gaining popularity among forward-thinking politicians and economists. Yang proposes that UBI is an essential step toward a new, more durable kind of economy, one he calls "human capitalism."

"A timely and smart discussion of how different cities and regions have made a changing economy work for them – and how policymakers can learn from that to lift the circumstances of working Americans everywhere." —Barack Obama We're used to thinking of the United States in opposing terms: red versus blue, haves versus have-nots. But today there are three Americas. At one extreme are the brain hubs—cities like San Francisco, Boston, and Durham—with workers who are among the most productive, creative, and best paid on the planet. At the other extreme are former manufacturing capitals, which are rapidly losing jobs and residents. The rest of America could go either way. For the past thirty years, the three Americas have been growing apart at an accelerating rate. This divergence is one of the most important developments in the history of the United States and is reshaping the very fabric of our society, affecting all aspects of our lives, from health and education to family stability and political engagement. But the winners and losers aren't necessarily who you'd expect. Enrico Moretti's groundbreaking research shows that you don't have to be a scientist or an engineer to thrive in one of the brain hubs. Carpenters, taxi-drivers, teachers, nurses, and other local service jobs are created at a ratio of five-to-one in the brain hubs, raising salaries and standard of living for all. Dealing with this split—supporting growth in the hubs while arresting the decline elsewhere—is the challenge of the century, and *The New Geography of Jobs* lights the way.

Traces lesser-known events in the history of the modern U.S. Capitol building while revealing the significant contributions of Confederacy president Jefferson Davis, Union quartermaster general Montgomery Meigs, and architect Thomas U. Walter.

In September 1999, an earthquake devastated much of Taiwan, toppling buildings, knocking out electricity, and killing 2,500 people. Within days, factories as far away as California and Texas began to close. Cut off from their supplies of semiconductor chips, companies like Dell and Hewlett-Packard began to shutter assembly lines and send workers home. A disaster that only a decade earlier would have been mainly local in nature almost cascaded into a grave global crisis. The quake, in an instant, illustrated just how closely connected the world had become and just how radically different are the risks we all now face. *End of the Line* is the first real anatomy of globalization. It is the story of how American corporations created a global production system by exploding the traditional factory and casting the pieces to dozens of points around the world. It is the story of how free trade has made American citizens come to depend on the good will of people in very different nations, in very different regions of the world. It is a story of how executives and entrepreneurs at such companies as General Electric, Cisco, Dell, Microsoft, and Flextronics adapted their companies to a world in which America's international policies were driven ever more by ideology rather than a focus on the long-term security and well-being of society. Politicians have long claimed that free trade creates wealth and fosters global stability. Yet Lynn argues that the exact opposite may increasingly be true, as the resulting global system becomes ever more vulnerable to terrorism, war, and the vagaries of nature. From a lucid explanation of outsourcing's true impact on American workers to an eye-opening analysis of the ideologies that shape free-market competition, Lynn charts a path between the extremes of left and right. He shows that globalization can be a great force for spreading prosperity and promoting peace—but only if we master its complexities and approach it in a way that protects and advances our national interest.

People will ask you throughout your life, "Where do you work?" and "What do you do?" They never ask you, "What are you building?" When conversations change to "What are you building?" the world will change. Written for anyone trying to figure out how to make the most of their lives, *Born to Build* seeks to inspire entrepreneurs and ambitious, self-motivated people to build something that will change the world. A builder's venture could be a small business that grows into a mammoth enterprise, a thriving new division in an existing company, a nonprofit, a social enterprise, a church, a school — anything that creates economic growth and makes a lasting impact on society. *Born to Build* is written by Gallup Chairman and CEO Jim Clifton and Sangeeta Badal, Ph.D., Principal Scientist for Gallup's Entrepreneurship and Job Creation initiative, and is grounded in years of research. This book goes beyond the conventional economics-based business training and instead offers a uniquely psychological approach to venture building. It gives readers the tools and techniques they need to understand who they are, what motivates them and what they can build — and how. By following the practical steps in *Born to Build*, readers will have the tools to build a sustainable and profitable venture of any size from scratch. Central to the book is a code that allows readers to take Gallup's Builder Profile 10 (BP10) assessment, which identifies their innate talents and motivations and shows them how to make the most of their talents to build a successful enterprise.

Chronicles the history of the American Civil War, starting with the Democratic Party's Charleston Convention in 1860, and ending with first battle of the war at Bull Run.

For the past 20 years, corporations have been receiving huge tax breaks and subsidies in the name of "jobs, jobs, jobs." But, as Greg LeRoy demonstrates in this important new book, it's become a costly scam. Playing states and communities off against each other in a bidding war for jobs, corporations reduce their taxes to next-to-nothing and win subsidy packages that routinely exceed \$100,000 per job. But the subsidies come with few strings attached. So companies feel free to provide fewer jobs, or none at all, or even outsource and lay people off. They are also free to pay poverty wages without health care or other benefits. All too often, communities lose twice. They lose jobs--or gain jobs so low-paying they do nothing to help the community--and lose revenue due to the huge corporate tax breaks. That means

fewer resources for maintaining schools, public services, and infrastructure. In the end, the local governments that were hoping for economic revitalization are actually worse off. They're forced to raise taxes on struggling small businesses and working families, or reduce services, or both. Greg LeRoy uses up-to-the-minute examples, naming names--including Wal-Mart, Raytheon, Fidelity, Bank of America, Dell, and Boeing--to reveal how the process works. He shows how carefully corporations orchestrate the bidding wars between states and communities. He exposes shadowy "site location consultants" who play both sides against the middle, and he dissects government and corporate mumbo-jumbo with plain talk. The book concludes by offering common-sense reforms that will give taxpayers powerful new tools to deter future abuses and redirect taxpayer investments in ways that will really pay off.
