Contemporary photography could be described as a photograph from our own time, compared to an image from a much earlier period. A relevant definition of the word contemporary is: "happening in the same period of time..of or in the style of the present or recent times... ." 1 Contemporary Photography is actually somewhere in the space in time between today, and the earliest inception of the medium. There are no bookends to defining a period for "Contemporary Photography".

A leading critic's inside story of "the photo boom" during the crucial decades of the 1970s and 80s When Andy Grundberg landed in New York in the early 1970s as a budding writer, photography was at the margins of the contemporary art world. By 1991, when he left his post as critic for the New York Times, photography was at the vital center of artistic debate. Grundberg writes eloquently and authoritatively about photography's "boom years," chronicling the medium's increasing role within the most important art movements of the time, from Earth Art and Conceptual Art to performance and video. He also traces photography's embrace by museums and galleries, as well as its politicization in the culture wars of the 80s and 90s. Grundberg reflects on the landmark exhibitions that defined the moment and his encounters with the work of leading photographers—many of whom he knew personally—including Gordon Matta-Clark, Cindy Sherman, and Robert Mapplethorpe. He navigates crucial themes such as photography's relationship to theory as well as feminism and artists of color. Part memoir and part history, this perspective by one of the period's leading critics ultimately tells a larger story about the crucial decades of the 70s and 80s through the medium of photography.

Contemporary Photography and Theory offers an essential overview of some of the key critical debates in fine art photography today. Building on a foundational understanding of photography, it offers an in-depth discussion of five topic areas: identity, landscape and place, the politics of representation, psychoanalysis and the event. Written in an accessible style, it introduces the critical literature relevant to photography that has emerged over recent decades. Moving beyond seminal works by writers such as Walter Benjamin, Roland Barthes, and Susan Sontag, it enables readers to explore an extended canon of theorists including Jacques Lacan, Judith Butler and Giorgio Agamben. The book is illustrated throughout and analyses a range of works by established and emergent artists in order to show how these theoretical concepts are central to understanding contemporary photography. These 15 short essays encourage readers to apply critical thinking to both their own work and that of others. They are the perfect starting point for essays as well being of suitable length for assigned readings, making this the ideal resource for learning about contemporary photography and theory.

Photography Is Magic draws together current ideas about the use of photography as an invaluable medium in the contemporary art world. Edited and with an essay by leading photography writer and curator Charlotte Cotton, this critical publication surveys the work of a diverse group of artists, many working at the borders of the "art world" and the "photography world," all of whom are engaged with experimental ideas concerning photographic practice and its place in a shifting photographic landscape being reshaped by digital techniques. Readers are shown the scope of photographic possibilities in the context of the contemporary creative process. From Michele Abeles and Walead Beshty to Daniel Gordon and Matthew Lipps, Cotton has selected artists who are consciously reframing photographic practices using mixed media, appropriation and a recalibration of analog processes. Cotton brings these artists together around the idea of magic, the properties of illusion and material transformation that uniquely characterize photography. Beautifully produced and critically rigorous, Photography Is Magic is aimed at younger photo aficionados, students and anyone interested in gaining a deeper understanding of contemporary photography. It includes images and text by more than 80 artists, including Sara Cwynar, Shannon Ebner, Annette Kelm, Josh Kline, Elad Lassry, Jon Rafman, Shirana Shahbazi and Sara VanDerBeek, among many others.
