The visual constitutes an increasingly significant element of contemporary organization, as post-industrial societies move towards economies founded on creative and knowledge-intensive industries. The visual has thereby entered into almost every aspect of corporate strategy, operations, and communication; reconfiguring basic notions of management practice and introducing new challenges in the study of organizations. This volume provides a comprehensive insight into the ways in which organizations and their

members visualize their identities and practices and how they are viewed by those who are external to organizations, including researchers. With contributions from leading academics across the world, The Routledge Companion to Visual Organization is a valuable reference source for students and academics interested in disciplines such as film studies, entrepreneurship, marketing, sociology and most importantly, organizational behaviour.

This companion explores ANT as an intellectual practice, tracking its movements and engagements with a wide range of other academic and activist projects. Showcasing the work of a diverse set of 'second generation' ANT scholars from around the world, it highlights the exciting depth and breadth of contemporary ANT and its future possibilities. The companion has 38 chapters, each answering a key question about ANT and its capacities. Early chapters explore ANT as an intellectual practice and highlight ANT's dialogues with other fields and key theorists. Others open critical, provocative discussions of its limitations. Later sections explore how ANT has been developed in a range of social scientific fields and how it has been used to explore a wide range of scales and sites.

Chapters in the final section discuss ANT's involvement in 'real world' endeavours such as disability and environmental activism, and even running a Chilean hospital. Each chapter contains an overview of relevant work and introduces original examples and ideas from the authors' recent research. The chapters orient readers in rich, complex fields and can be read in any order or combination. Throughout the volume, authors mobilise ANT to explore and account for a range of exciting case studies: from wheelchair activism to parliamentary decision-making; from racial profiling to energy consumption monitoring; from queer sex to Korean cities. A comprehensive introduction by the editors explores the significance of ANT more broadly and provides an overview of the volume. The
