Acclaimed wine writer Jon Bonné explains everything you need to know about wine in simple, easy-to-digest tidbits. For example: A wine's price rarely reflects its quality. You can drink ros  any time of year. Don't save a great bottle for anything more than a rainy day. Enjoy! -- Adapted from back cover.

Anthony Terlato's story is not simply the usual CEO narrative of achieving business success, nor i it the typical winemaker's tale of pursuing perfection in a glass. Straddling both of those stories, Terlato uses broad strokes to show how one individual had an enormous impact on Americans' wine-drinking habits. Wine journalist Linda Murphy described Terlato in the San Francisco Chronicle as "one of the most accomplished wine personalities on the planet," and readers of this account of a 50-year love affair with wine see this affable, intelligent man at his finest.

A comprehensive guide to the must-know wines and producers of California's "new generation," and the story of the iconoclastic young winemakers who have changed the face of California viticulture in recent years. The New California Wine is the untold story of the California wine industry: the young, innovative producers who are rewriting the rules of contemporary winemaking; their quest to express the uniqueness of California terroir; and the continuing battle to move the state away from the overly-technocratic, reactionary practices of its recent past. Jon Bonné writes from the front lines of the California wine revolution, where he has access to the fascinating stories, philosophies, and techniques of top producers. Part narrative, part authoritative purchasing reference, The New California Wine is a necessary addition to any wine lover's bookshelf.

Interest in and consumption of wine have grown exponentially in recent years and there has been a corresponding increase in consumers' knowledge of wine, which in turn has generated discussions about the meaning and value of wine in our lives and how renowned wine critics influence our subjective assessment of quality and shape public tastes. Wine first played a part in Western philosophy at the symposium of the early Greek philosophers where it enlivened and encouraged discussion. During the Enlightenment David Hume recommended drinking wine with friends as a cure for philosophical melancholy, while Immanuel Kant thought wine softened the harsher sides of men's characters and made their company more convivial. In Questions of Taste, the first book in any language on the subject, philosophers such as Roger Scruton and wine professionals like Andrew Jefford, author of the award-winning book The New France, turn their attention to wine as an object of perception, assessment and appreciation. They and their fellow contributors examine the relationship between a wine's qualities and our knowledge of them; the links between the scientifically describable properties of wine and the conscious experience of the wine taster; what we base our judgements of quality on and whether they are subjective or objective; the distinction between the cognitive and sensory aspects of taste; whether wine appreciation is an aesthetic experience; the role language plays in describing and evaluating wines; the significance of their intoxicating effect on us; the meaning and value of drinking wine with others; whether disagreement leads to relativism about judgements of taste; and whether we can really share the pleasures of drinking. Questions of Taste will be of interest to all those fascinated by the production and consumption of wine and how it affects our minds in ways we might not hitherto have suspected.
