But a garden ' s a garden anywhere, and twice a garden in London.

Great things happen in gardens. No one can doubt the importance of the garden in Roald Dahl's life as it was here where he worked, and here that he created James and the Giant Peach. And where would Jane Austen have been if she had never seen a 'walk', an ornamental lake, or a wilderness?

Gardening, more than most outdoor activities, has always attracted a cult of devotedly literate practitioners; people who like to dig, it would appear, also like to write. And many of them write exceedingly well. In this thoughtful, personal, and embracing consideration of garden writing, garden historian Elizabeth Barlow Rogers selects and discusses the best of these writers. She makes her case by picking delightful examples that span two centuries, arranging the writers by what they did and how they saw themselves: nurserymen, foragers, conversationalists, philosophers, humorists, etc. Her discussions and appreciations of these diverse personalities are enhanced and supported by informed appraisals of their talents, obsessions, and

idiosyncrasies, and by extensive extracts from their writings. Rogers provides historical background, anecdotal material, and insight into how these garden writers worked. And wherever appropriate, she illustrates her story with images from their books, so you can not only read what they wrote but also see what they were describing. Since gardens are by their very nature ephemeral, these visual clues from the pages of their books, many reproduced in color, are as close as we will come to the originals. What makes *Writing the Garden* such a joy to read is that it is not simply a collection of extracts, but real discussions and examinations of the personalities who made their mark on how we design, how we plant, and how we think about what is for many one of life's lasting pleasures. Starting with "Women in the Garden" (Jane Loudon, Frances Garnet Wolseley, and Gertrude Jekyll) and concluding with "Philosophers in the Garden" (Henry David Thoreau, Michael Pollan, and Allen Lacy), this is a book that encompasses the full sweep of the best garden writing in the English language. *Writing the Garden* is co-published by the New York Society Library and the Foundation for Landscape Studies in association with David R. Godine, Publisher.

By the time she reached her late twenties, Eudora Welty (1909-2001) was launching a distinguished literary career. She was also becoming a capable gardener under the tutelage of her mother, Chestina Welty, who designed their modest garden in Jackson, Mississippi. From the beginning, Eudora wove images of southern flora and gardens into her writing, yet few outside her personal circle knew that the images were drawn directly from her passionate connection to and abiding knowledge of her own garden. Near the end of her life, Welty still resided in her parents' house, but the garden-and the friends who remembered it-had all but

vanished. When a local garden designer offered to help bring it back, Welty began remembering the flowers that had grown in what she called “my mother’s garden.” By the time Eudora died, that gardener, Susan Haltom, was leading a historic restoration. When Welty’s private papers were released several years after her death, they confirmed that the writer had sought both inspiration and a creative outlet there. This book contains many previously unpublished writings, including literary passages and excerpts from Welty’s private correspondence about the garden. The authors of *One Writer’s Garden* also draw connections between Welty’s gardening and her writing. They show how the garden echoed the prevailing style of Welty’s mother’s generation, which in turn mirrored wider trends in American life: Progressive-era optimism, a rising middle class, prosperity, new technology, women’s clubs, garden clubs, streetcar suburbs, civic beautification, conservation, plant introductions, and garden writing. The authors illustrate this garden’s history—and the broader story of how American gardens evolved in the early twentieth century—with images from contemporary garden literature, seed catalogs, and advertisements, as well as unique historic photographs. Noted landscape photographer Langdon Clay captures the restored garden through the seasons.

One of our finest writers on one of her greatest loves. Jamaica Kincaid's first garden in Vermont was a plot in the middle of her front lawn. There, to the consternation of more experienced friends, she planted only seeds of the flowers she liked best. In *My Garden (Book)* she gathers all she loves about gardening and plants, and examines it generously, passionately, and with sharp, idiosyncratic discrimination. Kincaid's affections are matched in intensity only by her dislikes. She loves spring and summer but cannot bring

herself to love winter, for it hides the garden. She adores the rhododendron Jane Grant, and appreciates ordinary Blue Lake string beans, but abhors the Asiatic lily. The sources of her inspiration -- seed catalogues, the gardener Gertrude Jekyll, gardens like Monet's at Giverny -- are subjected to intense scrutiny. She also examines the idea of the garden on Antigua, where she grew up. *My Garden (Book)* is an intimate, playful, and penetrating book on gardens, the plants that fill them, and the persons who tend them.

This anthology draws together more than 50 writers—including W.S. Merwin, Michael Pollan and M.F. K. Fisher—from across 300 years of garden writing. Idiosyncratic, determined, and occasionally obsessed, gardeners have a lot to say about their outdoor passion. *The Writer in the Garden* brings together a host of writing gardeners and gardening writers who revel in their quirks and reflect on their experiences. Subjects range from the beauty of the garden to ornery weeds, the hazards of rare plant collecting, and the tribulations of inclement weather. Editor Jane Garmey has discovered some great contemporary works and rediscovered many classics, and the volume features many authors from both sides of the Atlantic: from Edith Wharton, who insists that we could stand to learn about design from the Italians, to Stephen Lacey, who reveals that his most exciting gardening moments are spent in the bath. Other writers in the collection include: E. B. White, Beverly Nichols, Ken Druse, Eleanor Perenyi, Mirabel Osler, Henry Mitchell, Jamaica Kincaid, Robert Dash, Sara B. Stein, Anne Raver, Patti Hagan, Paula Deitz.

president of the Beatrix Potter Society There aren't many books more beloved than *The Tale of Peter Rabbit* and even fewer authors as iconic as Beatrix Potter. More than 150 million copies of her books have sold worldwide and interest in her work and life remains high. And her characters—Peter Rabbit, Jemima Puddle Duck, and all the rest—exist in a charmed world filled with flowers and gardens. *Beatrix Potter's Gardening Life* is the first book to explore the origins of Beatrix Potter's love of gardening and plants and show how this passion came to be reflected in her work. The book begins with a gardener's biography, highlighting the key moments and places throughout her life that helped define her, including her home Hill Top Farm in England's Lake District. Next, the reader follows Beatrix Potter through a year in her garden, with a season-by-season overview of what is blooming that truly brings her gardens alive. The book culminates in a traveler's guide, with information on how and where to visit Potter's gardens today.

“ Unlike any other gardening book I know, with its Old World charm, its down-to-earth practicality, its whimsy and sophistication. ” —Brooke Astor, *The New York Times Book Review* A classic in the literature of the garden, *Green Thoughts* is a beautifully written and highly original collection of seventy-two essays, alphabetically arranged, on topics ranging from “ Annuals ” and “ Artichokes ” to “ Weeds ” and “ Wildflowers. ” An amateur gardener for over thirty years, Eleanor Perényi draws upon her wide-ranging knowledge of gardening lore to create a delightful, witty blend of how-to advice, informed opinion, historical insight, and philosophical musing. There are entries in praise of earthworms and in protest of rock gardens, a treatise on the sexual politics of tending plants, and a paean to the salubrious effect of gardening (see “ Longevity ” ). years after its initial publication, *Green Thoughts* remains as much a joy to read as ever. This Modern Library edition is published with a new Introduction by Allen Lacy, former gardening columnist for *The Wall Street Journal* and *The New York Times* and the author of numerous gardening books. “ You do not have to be a good gardener to fall in love with *Green Thoughts*. It reads with the intrepid assurance of a classic. ” —Mary McCarthy, *The New York Review of Books* “ One of those dangerous reference works that you reach for at a moment of horticultural crisis or indecision only to find yourself an hour later browsing far beyond the page where you began. ” —*The New Yorker*

A new edition of Nicola Shulman's miniature masterpiece about the life of gardener Reginald Farrer A hundred years ago, there was a revolution in British gardening, as the garden changed from being a diversion of dukes to the hobby of millions. Few figures were more prominent in this renaissance than Reginald Farrer, whose passion for alpinism, the most demanding of plants, would inspire generations with a love of flowers. He was the man who put a rockery in every back garden. Tormented by physical and emotional misfortune, Farrer was one of those 'born to endless night'. Yet in the realm of horticulture his many faults were turned to advantages, and he became one of the great plant-hunters, collecting new species from the mountains of Tibet and China. Through the influence of his extraordinary books, Farrer did for English gardening what, half a century later, Elizabeth David would do for its cookery, changing everything forever.

In 1925 Harold Ross hired Katharine Sergeant Angell as a manuscript reader for *The New Yorker*. Within months she became the magazine's first fiction editor, discovering and

championing the work of Vladimir Nabokov, John Updike, James Thurber, Marianne Moore, and her husband-to-be, E. B. White, among others. After years of cultivating fiction, White set her sights on a new genre: garden writing. On March 1, 1958, *The New Yorker* ran a column entitled “Onward and Upward in the Garden,” a critical review of garden catalogs, in which White extolled the writings of “seedmen and nurserymen,” those unsung authors who produced her “favorite reading matter.” Thirteen more columns followed, exploring the history and literature of gardens, flower arranging, herbalists, and developments in gardening. Two years after her death in 1977, E. B. White collected and published the series, with a fond introduction. The result is this sharp-eyed appreciation of the green world of growing things, of the aesthetic pleasures of gardens and garden writing, and of the dreams that gardens inspire.

From the Booker Prize winner and national bestselling author, reflections on gardening, art, literature, and life Penelope Lively takes up her key themes of time and memory, and her lifelong passions for art, literature, and gardening in this philosophical and poetic memoir. From the courtyards of her childhood home in Cairo to a family cottage in Somerset, to her own gardens in Oxford and London, Lively conducts an expert tour, taking us from Eden to Sissinghurst and into her own backyard, traversing the lives of writers like Virginia Woolf and Philip Larkin while imparting her own sly and spare wisdom. “Her body of work proves that certain themes never go out of fashion,” writes the *New York Times Book Review*, as true of this beautiful volume as of the rest of the Lively canon. Now in her eighty-fourth year, Lively muses, “To garden is to elide past, present, and future; it is a defiance of time.”
