Creating a project scope statement that concisely, clearly, and accurately outlines the project's parameters requires special skills and tools. Yet too frequently, many project stakeholders lack these skills and tools. Because of this, they often create a scope statement developed over weeks instead of days that contains unclear project boundaries, which usually set the stage for scope creep.

Cscope is a very powerful interface allowing you to easily navigate C-like code files. While Cscope comes with its own stand-alone interface, Vim provides the capability to navigate code without ever leaving the editor. Using Cscope, you can search for identifier or function definitions, their uses, or even any regular expression.
