And the amount of water and other fluids you drink is directly proportionate to the amount of urine you'll produce, if you're healthy (more on that, later). That's why, if you increase your daily water intake and frequent urination becomes part of a routine because of it, it's a perfectly normal response.

## **Daily Water Intake and Frequent Urination | Livestrong.com**

Deionized water aggressively attacks pipes and storage container materials, leaching metals and other chemicals into the water. Drinking DI may lead to increased risk of metal toxicity, both because deionized water leaches metals from pipes and containers and because hard or mineral water protects against absorption of other metals by the body.
