Lighting - Filmtools

Proper lighting techniques are essential in creating stylized and natural-looking film scenes that look much closer to real life as digital sensors and film don't react as well to light as our eyes do. This is why film sets always seem to be overly lit or packed with many different light sources that serve different purposes.

Basic Cinematography Lighting Techniques - 42 West, the ...

But it can be useful to own a basic portable light; maybe not to use as a main lighting source, but as a 'fill'. Traditionally films used three-point lighting, but you may not need three lights. Many documentary makers just use one light plus a reflector for fill. You can get the three-point effect by adding a second rim light to this.
