distinct advantage over your competitors.

## **World Class Manufacturing: The Next Step Beyond Lean**

World-class OEE is a myth, 85% was a number pulled out of the sky. The overall OEE number will be different for every manufacturer and different machines will have different OEEs on the floor. We talked about OEE being a flawed metric , but let's take an even deeper dive into the world of OEE, specifically the notion of world-class OEE.

## **Why is World-Class OEE a Myth? - SensrTrx | Manufacturing ...**

An OEE score of 85% is considered world class for discrete manufacturers. For many companies, it is a suitable long-term goal. An OEE score of 60% is fairly typical for discrete manufacturers, but indicates there is substantial room for improvement.

## **OEE Measures Improvements in Productivity | Lean Production**

Defining World-Class. OEE is the ratio of Fully Productive Time to Planned Production Time (refer to the OEE Factors page for a graphical representation). It is calculated as the product of its three constituent factors:  $OEE = Availability \times Performance \times Quality$ . The nature of this calculation makes achieving a high OEE score quite challenging. For example, if all three factors are 90% ...

## **World-Class OEE - Set OEE Targets To Drive Improvement | OEE**

World Class Manufacturing is being worked on by many companies today under many names. Some of the names include: Just-In-Time (JIT) or Lean Manufacturing, Total Employee Involvement (TEI), Value-Added Manufacturing (VAM),
