The concept of Lean MRP is a novel one, which holds the promise of transformational change, particularly in job shop environments involving deep bills of materials. In addition to attaining the on-time performance, inventory, and lead time benefits of a pull system, Lean MRP can also help improve the accuracy of forward-looking schedule projections

"MRP (Material Requirements Planning)"
is a concept of creating material plans
and production schedules based on the
lead times of a supply chain. However,
even if you create an MRP-based plan
based on an ideal factory model,
problems may still actually occur.

MRP (Material Requirements

Planning) | Lean Manufacturing

One of the most important tools in lean manufacturing is create a value stream map to outline the flow of information and materials in the manufacturing plant. Modeling how information and materials flow through a shop floor will allow manufacturers to more easily identify production bottlenecks. 2.
