**Managing Doctors In Difficulty Newcastle**  
Personal factors could be a distraction for some doctors, and in other cases the doctor's personality traits could clash with those of the patient. In addition, it can be easy to stereotype or label certain patients or their behaviours, which might influence the doctor's perception of the difficulty of the consultation.

INTRODUCTION. Depression remains a problem for primary care practice and research. 1 Some see depression as independent of time, place, and culture; common in primary care; 2 and effectively managed there. In this view, research should focus on improving management through training doctors, providing public education, and reorganizing practice systems. 5 Others suggest that concepts of ...
