the test is the fact that the questions require logical thought processes and the remembrance of facts, figures and information read throughout the problem or previously studied.

### **Objective Type of Questions & Answers for English | Synonym**

Objective questions are, as the name suggests, question with an objective answer. An objective answer is an answer that stays the same no matter how many times the question is being asked. Example: What is the chemical formula for water? The answer is H<sub>2</sub>O, nothing else. A subjective question is a question that can be provided many different answers.
