Oral Motor Assessment And Treatment 3810

To any parents reading this - If you are at all concerned about your child's oral motor / feeding skills, please do consult with a feeding therapist so they can assess things in person, put together a personalized treatment plan if needed, and guide you through it. Debbie Debra C. Lowsky, MS, CCC-SLP .

What Do I Look for in an Oral Motor / Feeding Assessment ...

An oral motor feeding impairment is a child's inability to prepare food orally, move food through the mouth and/or swallow food. This is a result of muscle weakness, absent or altered anatomy and/or poor coordination of muscles in the mouth. Both sensory-behavioral and oral motor feeding impairments may result in inadequate nutrition, poor weight gain or weight loss, poor growth and in extreme cases, possible need for a feeding tube.
