Long-awaited Sunpak 120J II bare-bulb flash is 'coming ...

If any question, you can determine an accurate guide number yourself by knowing what works for your flash. GN = f/Number x distance. Use the numbers which work to give a correct exposure at a measured distance and manual flash power. And try to use f/4, f/8 or f/16 for that, slightly more accurate, because the other intermediate values are ...
